A T L A S

countries that were never surveyed

6 plates

MDCCCI

drawn by a machine from a single number

COLOPHON

Every plate in this book was computed, not drawn. A single integer is expanded into a height field by fractal noise; water is routed downhill across that field; valleys are cut along the drainage; climate is derived from latitude and altitude; provinces are grown from watersheds; and the names are coined from a phonology invented for each province.

The same integer always produces the same country. There is no other copy of it anywhere, and no one has been there.

Composed with Pillow and numpy. Set in Garamond and Book Antiqua.

LAETHSKETHLECHAEREACH

a survey of the country, in 5 provinces

Laethskethlechaereach lies between the 12th and 58th parallels, a country of 34 parts land to 66 of water. Its western approaches are held by the Gainiltrelt, and the Wiagestsvu closes it to the east.

The interior rises to 3100 metres.

The Thimzughbu is the longest of the waters shown here; the Vreiltkhy are its chief tributaries.

Lakes occupy 5.8 parts in a hundred of the land, most of them strung along the courses of the greater rivers.

The country is divided into Skuslailfythfia, Deingsultheiskpeilgard, Sveltkaisksvemoor, Svistwistsvimath and Viasrialtvale. Of the towns, Lulluthhuskhaimouth is the largest, and Fuschohaven the most remote.

The coast is drawn at the survey of the year given in the title, and the soundings are in fathoms. No part of this country has been visited twice.

SAUMVROLSKAUMOOR

a survey of the country, in 4 provinces

Saumvrolskaumoor lies between the 12th and 58th parallels, a country of 33 parts land to 67 of water. Its western approaches are held by the Shosstisfia, and the Lothiandsor closes it to the east.

The interior rises to 3300 metres. The Cheskhourkzu and the Stostgaiskvaist carry the highest ground, and the rivers that leave them run clear to the sea.

The Skiskshaingshaingviark is the longest of the waters shown here; the Daungdiangdrau are its chief tributaries.

Lakes occupy 5.8 parts in a hundred of the land, most of them strung along the courses of the greater rivers.

The country is divided into Cailtcaumsvymora, Talzairndhesath, Skorkshoststosvirnmark and Daikhaughdroureach. Of the towns, Woubreimouth is the largest, and Sviarntesdhiaburg the most remote.

CAUNOUTHCOUNIA

a survey of the country, in 3 provinces

Caunouthcounia lies between the 12th and 58th parallels, a country of 34 parts land to 66 of water. Its western approaches are held by the Svunmaun, and the Theirnskultgiatro closes it to the east.

The interior rises to 3400 metres. The Trondfeilt and the Yyskystry carry the highest ground, and the rivers that leave them run clear to the sea.

The Ceitrystrarn is the longest of the waters shown here; the Thundgialtglongtrou are its chief tributaries.

Lakes occupy 5.7 parts in a hundred of the land, most of them strung along the courses of the greater rivers.

The country is divided into Hiathgyzymark, Mosgeighheim and Niakaendheim. Of the towns, Geigyhaumouth is the largest, and Yurdriamburg the most remote.

KAIDHIHOLT

a survey of the country, in 4 provinces

Kaidhiholt lies between the 12th and 58th parallels, a country of 33 parts land to 67 of water. Its western approaches are held by the Reghpouth.

The interior rises to 3200 metres.

The Nournfoufu is the longest of the waters shown here; the Vaethkultmouth are its chief tributaries.

Lakes occupy 4.7 parts in a hundred of the land, most of them strung along the courses of the greater rivers.

The country is divided into Driasfywyn, Mianthia, Paurnkougugard and Touthvouthtuland. Of the towns, Thyrnfeispibridge is the largest, and Cernravihaven the most remote.

The coast is drawn at the survey of the year given in the title, and the soundings are in fathoms. No part of this country has been visited twice.
