TERRA FICTA

countries that were never surveyed

12 plates

MDCCCI

drawn by a machine from a single number

COLOPHON

Every plate in this book was computed, not drawn. A single integer is expanded into a height field by fractal noise; water is routed downhill across that field; valleys are cut along the drainage; climate is derived from latitude and altitude; provinces are grown from watersheds; and the names are coined from a phonology invented for each province.

The same integer always produces the same country. There is no other copy of it anywhere, and no one has been there.

Composed with Pillow and numpy. Set in Garamond and Book Antiqua.

CHOUCHULDORA

a survey of the country, in 5 provinces

Chouchuldora lies between the 12th and 58th parallels, and holds 34 parts land to 66 of water. The Baibesvau breaks upon its western shore, and the Zosveisvol closes it to the east.

The ground rises to 3100 metres. The Siseiseli and the Baunisvi carry the highest of it, and the waters that leave them run clear to the sea.

The Gozebe is the longest of the rivers shown, with the Troweibei among its tributaries. Lakes take up 5.6 parts in a hundred of the land, most of them strung along the greater courses.

The country is divided into Hauhistora, Bichaulreach, Wogirkath, Gleicia and Laiskoulholt. Of the towns, Finergate is the largest and Pililmouth the most remote. No part of this country has been visited twice.
